Introduction	
1. Outline	1
2. Motivation of research	2
3. Aim of this book and research questions	4
4. Summary	5
<i>References</i>	5
1. Megaprojects and sustainable infrastructure: an historical overview	
1.1. Megaprojects in a nutshell	7
1.1.1. From individual to collective sublimations: toward the definition of a fifth sublime	9
1.2. Sustainable infrastructure or infrastructural territorialization	10
1.3. The need of a framework for sustainable infrastructure	13
1.4. Toward a dialogic accounting approach	15
1.5. Summary	16
<i>References</i>	17
2. Towards sustainable development: megaproject social responsibility and stakeholder engagement	
2.1. Introduction	21
2.2. The social responsibilities of megaprojects	23
2.3. Towards a relational stakeholder theory for megaproject management	24
2.4. Managing stakeholders in megaprojects	27
2.5. Summary	30
<i>References</i>	30

3. Critical infrastructure and sustainable development: a paradoxical link	
3.1. Introduction	37
3.2. Defining critical infrastructure	38
3.3. Mapping the research field on critical infrastructure sector and climate change	40
3.4. Mapping the field on critical infrastructure and SDGs	42
3.5. A benchmark analysis of critical infrastructural megaprojects in the transportation sector	44
3.5.1. Methodology	45
3.5.2. Impacts mentioned in the reports and connection to SDGs	46
3.6. Summary	48
3.7. Annex I: list of impacts	49
<i>References</i>	52
4. A literature review on impact accounting & stakeholder management	
4.1. Main features of megaprojects	57
4.1.1. Types of megaprojects	58
4.1.2. Projects' phases	59
4.1.3. Sustainable infrastructure's pillars	59
4.1.4. Impact accounting category	60
4.2. Methodology	61
4.2.1. Research questions	62
4.2.2. Protocol and research sample	62
4.2.3. Coding framework	65
4.3. Results	65
4.3.1. Trend	66
4.3.2. Journal	66
4.3.3. Citation network	67
4.3.4. Geographic distribution	68
4.3.5. Topic trends	69
4.3.6. Keyword co-occurrence	72
4.4. Discussion	73
4.4.1. Future research trends	76
4.5. Summary	80
<i>References</i>	81

5. Environmental justice movement: social and environmental conflicts	
5.1. The emergence of the environmental justice movement	91
5.1.1. About free riders, commons and distributional economics	92
5.2. Conflicts and megaprojects: the challenge of stakeholders' management	97
5.3. Toward an inclusive and systemic management of infrastructure projects	100
5.4. Summary	102
<i>References</i>	102
6. A historical and empirical analysis of stakeholders in the Turin-Lyon railway line: towards an inclusive and ecosystemic vision of stakeholder management	
6.1. Introduction	107
6.2. A short history of the Turin-Lyon high speed rail	108
6.3. Methodology	113
6.4. Results	114
6.5. Summary	116
<i>References</i>	116
7. Between sustainability and social innovation: the importance of the local identity and communities	
7.1. Introduction	119
7.2. Background	120
7.2.1. The crisis of the center-periphery model: the complexity and new strategic centrality of mountain and metro-mountain areas	121
7.2.2. A hybrid mountain: the case of the Susa Valley	123
7.2.3. A new institutional perspective to overcome the "marginality" of places	126
7.3. Methodology	127
7.4. Results and findings	129
7.4.1. A "responsible" ecosystem with a strong identity	133
7.5. Conclusions	137
7.6. Summary	139
<i>References</i>	139

	<i>page</i>
8. Conclusion	
8.1. A critique of the status quo	143
8.2. Limits and future opportunities	145
8.3. Summary	145
<i>References</i>	146
 <i>Index</i>	 147
