## 1.

### Introduction to Accounting Education and Research Design

1.1.	The Purpose of the Book	1
1.2.	Research Design Overview	4
1.3.	The Educational Scope of the Research	6
1.4.	A unique approach to bibliometric reviews: Latent Dirichlet Allocation topic modeling	7
1.5.	Bibliometric overview of the Accounting Education field	10
1.6.	The current state-of-the-art of Accounting Education: a machine learning approach	16

## 2.

### Online Learning in Accounting Education: Lessons Learned from the COVID-19 Pandemic

2.1.	Insights from the LDA topic modeling: a machine learning powered literature review	27
2.1.1.	Accounting Education and Digital Technology: the introduction of blended learning	29
2.1.2.	Lessons Learned from the COVID-19 Pandemic: synchronous and asynchronous online learning	31
2.2.	Empirical Case Study	33
2.2.1.	The Case Study of the University of Turin	35
2.2.2.	Results: Insights from Italian Accounting Higher Education Teachers	37
2.2.3.	Implications of the Case Study	41

2.3. Profiling the future research directions of Accounting Education: Online Learning in Accounting Education	43
---	----

### 3.

#### Accounting Education and Gamification

3.1. Insights from the LDA topic modeling: a machine learning powered literature review	47
3.1.1. Challenges and Barriers to Gamification in Accounting Edu- cation	49
3.2. Gamification in Accounting Education	50
3.2.1. Mobile Game Learning in Accounting Education	50
3.2.2. Board Games in Accounting Education	52
3.3. Case Study – Partial Least Squares Approach	53
3.3.1. The perspective of accounting students on game-based learning: a PLS-SEM approach	53
3.3.2. Results: Insights from accounting students on the willing- ness to continue adopting game-based learning in the ac- counting classroom	59
3.3.3. Implications of the study	65
3.4. Profiling the future research directions of Accounting Education: Accounting Education and Gamification	66

### 4.

#### Update of Accounting Education Curricula

4.1. Insights from the LDA topic modeling: the need for Accounting edu- cators to rethink the curricula of accounting courses	67
4.2. Updating Accounting curricula amid current job market expectations	69
4.2.1. Technology, Blockchain and Artificial Intelligence in Ac- counting curricula	69
4.2.2. ESG in Accounting Education in Accounting curricula	71
4.2.3. Sustainability in Accounting Education in Accounting cur- ricula	72
4.2.4. Leadership, Critical Thinking and Soft Skills in Accounting curricula	73

	<i>pag.</i>
4.3. Empirical Case Study: University of Turin, D-ESG Master	74
4.3.1. The Case Study Methodology	75
4.3.2. Results: Insights from D-ESG Master-level Accounting educators on the need for academia to rethink the curricula of accounting courses	77
4.3.3. Implications of the Case Study	79
4.4. Profiling the future research directions of Accounting Education: Update of Accounting Education Curricula	81
